

Generate *Tests'* based
on the Documentation
& Execute *Tests'* on *Code*

Phase 1: Inconsistency Detection

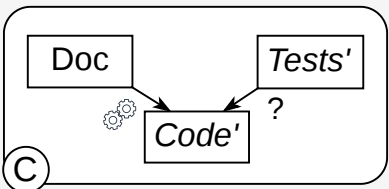

If *Tests'* fail **X**: indicator for a potential
inconsistency (⚡) **But only if:**
***Tests'* & Documentation**
are consistent ✓?

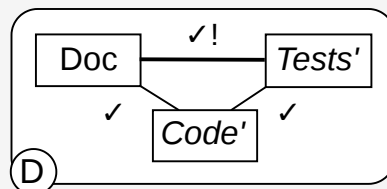

+

Phase 2: False Positive Reduction

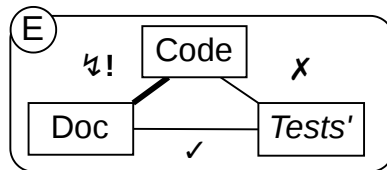

Generate *Code'* based
on the Documentation
& Execute *Tests'* on *Code'*

If *Tests'* pass ✓:
***Tests'* & Documentation**
are consistent ✓!

=

The new tests correctly showed
an **inconsistency ⚡** between
Code & Documentation
